DNS[®] color print
Mondi's smooth digital
colour printing paper

DNS® color print Mondi's smooth digital colour printing paper

DNS® color print's super smooth surface produces excellent digital print results with sharp, vibrant colours. Impressive contrasts and eye-catching images are achieved effortlessly due to a high whiteness level (170 CIE) that is optimal for marketing collateral. The paper is designed especially for colour laser printers, copiers and digital colour presses and is ideal for your day-to-day printing needs.

Together with the printer's skill DNS® color print accentuates the benefits of digital printing with high-quality, customised small print runs, print-on-demand and variable data applications. Optimised with ColorLok® Technology, DNS® color print also achieves excellent results on office inkjet printers that use pigmented ink.

Ideal for applications that demand high-impact colour saturation, such as colourful graphics, DNS® color print is an excellent choice for printing important office documents that help you to stand out and impress your customers. It is also suitable for pre-print applications such as company letterheads and stationery.

Meeting the demands of today's digital printing presses, DNS® color print comes in a wide range of grammages, ranging from 80 to 350 g/m², and a variety of formats (A4, A3, SRA3, folio and reels) to support you with all of your creative applications.

DNS® color print benefits at a glance

- Ideal for your day-to-day digital colour print jobs
- Smooth finish and high opacity for perfect colour reproduction
- Highest whiteness for contrast-rich print jobs
- Wide assortment of grammages and formats for endless creative possibilities
- FSC® and EU Ecolabel – a sustainably produced Green Range product to reflect your company's environmental priorities
- Specially developed for digital colour printing on colour laser and inkjet printers, copiers and digital colour presses
- Preprint suitable
- Maximum machine performance thanks to the paper's excellent runnability

Range overview

Formats	Grammages (g/m²)								
	80*	90*	100*	120*	160*	200	250	300	350
